LOVEHANDLES®

Lift and move with confidence
while reducing the chance of accidental injuries

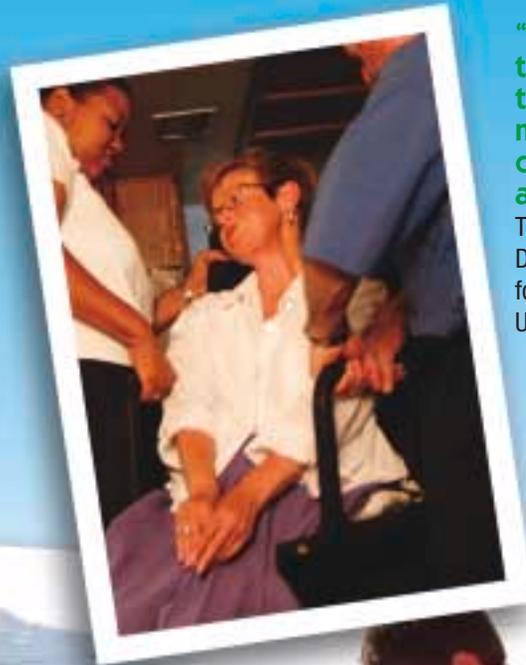

For people with disabilities, life holds enough challenges. Getting from here to there shouldn't be one of them.

That's why RedBarn Enterprises created **LoveHandles** – the simple, safe solution for assisted mobility.

LoveHandles puts an end to the clumsy and sometimes dangerous methods of transporting disabled individuals. Instead, disabled persons remain securely and comfortably seated as they're lifted and transported easily, quickly and with dignity. And, because **LoveHandles** are precisely engineered, well-balanced and finely crafted, assistants can stay in control and confident while moving and carrying.

"LoveHandles are a tremendous help to the people that help me, because they don't get hurt lifting and moving me."

Tedde Scharf, Associate Director, Disability Resources for Students, Arizona State University

"When I travel, I can't afford to be injured by people who don't know what they're doing, no matter how well-meaning they may be. Uses of a device like this, which assists in creating a more safe transfer for me is something that I really welcome..."

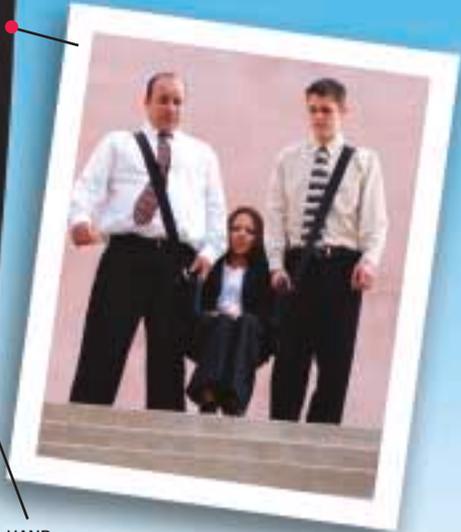

Bill Scott, President, Abilities Unlimited

Because **LoveHandles** are made with space-age materials they are fully submersable and will not rust

LOVEHANDLES®

Computer Designed for the Ultimate in Comfort, Balance and Safety

Built for Safety, Built to Last

We designed **LoveHandles** with safety in mind, first and foremost. Standard features include a 2-inch wide, adjustable, easy-lock seatbelt, four hand straps, and ergonomically designed, non-slip grips. In addition, optional shoulder carry straps free carriers' hands, providing them with greater flexibility and stability. All seams are double stitched for strength, and **LoveHandles'** rugged materials ensure a lifetime of use. In addition, **LoveHandles** will accommodate most popular seat cushions.

HAND STRAPS

OPTIONAL "SHOULDER CARRY STRAPS" PROVIDE A COMFORTABLE AND CONVENIENT, HANDS-FREE WAY TO CARRY AND ARE EASILY ADJUSTABLE WITH EITHER HAND.

"LoveHandles makes it possible for two people to simply put someone in the seat, walk right out – upstairs or downstairs – without any problem at all. I know **LoveHandles** would make firefighters' jobs easier. They'd be able to move people quickly without accidentally hurting them."
